- Email: moha1234566044@gmail.com
- Website: <http://mohamedhassan.epizy.com/>
- Location: Fayoum, Egypt

## Accomplishments

- Jobhub: a job portal built on PHP Laravel and MySQL. It has the main functionalities every job portal has like creating, applying and saving jobs, search functionality, and multiple languages and categories admin panel and so much more
- Blogia: a blog built on top of PHP OOP MVC framework and MySQL. It has some great features like registration and login system, creating, updating, and deleting system, recommended posts, posts counter for every user and so much more.
- ChatApp: It's one of my biggest challenges. It's a full chat web application that's built on top of PHP Laravel, WebSockets library, pusher and so much more. in the app you can create your own chat groups manage and add new members and a whole lot more.

## SKILLS AND ABILITIES
